FLIGHT DENTAL SYSTEMS

Flight Automatic Handpiece Maintenance System with compressor

True plug-and-play maintenance with a built-in low-noise compressor

The Flight Automatic Handpiece Maintenance System with compressor is a true plug-and-play maintenance unit with a built-in lownoise compressor, eliminating the need for an external compressed-air line. Designed for 110 V operation, it supports one low-speed and two high-speed connections and includes a chuck lubricator to help complete a consistent handpiece lubrication routine. This model has a built-in compressor, making it a truly plug-and-play unit, so you don't need an external air source.

SPECIFICATIONS:

- **110 V operation**
- **Built-in lownoise compressor**
- **No external compressed air line required**
- **1 low-speed connection**
- **2 high-speed connections**
- **Chuck lubricator included**
